RE: Authorization to Enter into Contract with the New York State Department of Health to Accept Continued Funding for the Healthy Neighborhood Program Grant as follows:

Multi Year Term: 10/1/09 – 9/30/12
Contract Period: 10/1/11 – 9/30/12
Amount: Not-To-Exceed \$330,000

The Westchester County Department of Health (“WCDH”) requests authorization to enter into contract with the New York State Department of Health (“NYSDOH”) to accept continued funding for the Healthy Neighborhood Program (“HNP”) grant, pursuant to an approved budget, for the period 10/01/11 through 09/30/12, in the not-to-exceed amount of \$330,000.

This program promotes the public health and welfare of County residents through prevention or reduction of asthma related hospitalizations, health effects of tobacco and second hand smoke among household residents, residential fire deaths, childhood lead poisoning, and the improvement of indoor air quality within these residential dwellings.

Program objectives and goals include decreased asthma-related illnesses through the dissemination of preventive health information; reduction of tobacco use; reduction of incidence of home fire-related deaths; reduction of blood lead levels greater than ten micrograms in children ages one to six years. Through this program the WCDH gathers environmental, health and general demographic information which supports the continued assessment and monitoring of the health status of Westchester County residents.

The WCDH tracks and monitors this program through the completion of a Home Intervention Survey Form by WCDH staff for each on-site housing assessment and compilation of statistical data which is entered into the electronic HNP data reporting system. In addition, reports are submitted on a quarterly basis to the NYSDOH.

Program outcomes for the 2009-2010 grant period, the most recent year for which complete data are available, include the completion of 541 home safety inspections, referral of 65 children for necessary lead screening, and identification of 16 residents with asthma conditions requiring medical follow up.
