The Westchester County Department of Health (the "WCDH") seeks authorization to enter into contracts with various providers (as identified below), to provide TB clinic patient chest x-rays and other radiological tests and interpretations as needed, for the period 3/1/13 through 2/28/14, in the total aggregate not-to-exceed amount of \$36,500, with each provider to be paid pursuant to an approved budget at the same rates as negotiated by the WCDH.

Providers:

Sound Shore Medical Center of Westchester  
Phelps Memorial Hospital Center  
Mount Vernon Hospital  
St. Joseph's Hospital, Yonkers d/b/a St. Joseph's Medical Center  
White Plains Hospital Medical Center  
Hudson Valley Hospital Center

In order to promote the public health, safety and general welfare of Westchester County residents, and in accordance with New York State Public Health Law, the WCDH must ensure for the appropriate diagnosis, care and treatment of patients with suspected and/or confirmed cases of Tuberculosis ("TB"). Chest x-rays and other radiological studies are a recognized diagnostic method used to determine the clinical status of these patients. All patients that receive chest x-rays and other radiological tests and interpretations as needed are screened and referred by WCDH clinics. In 2012, the WCDH had approximately 2,000 TB clinic visits and 363 chest x-rays were performed by the Providers.

The goal and objective of this program is to reduce the incidence of TB related illness among all age groups throughout the County by ensuring comprehensive and follow up medical care for all confirmed TB patients. Radiological testing and diagnosis is an early detection method and part of a complete TB curative plan that will help contain the spread, prevention and management of this disease as well as decrease treatment costs for the underinsured/uninsured.

The program is tracked and monitored by the electronic recording of all hospital referrals and through review and audit of individual patient records and monthly service lists for each hospital. All confirmed or suspect TB cases are entered into the Health Information Network (HIN) using the required information/forms to generate monthly management reports which are used by the WCDH to monitor caseloads, service utilizations rates and payments for rendered services. Payments to all providers are made in accordance pursuant to an approved budget at the same rates as negotiated by the WCDH, and are eligible for State aid reimbursement from the New York State Department of Health.

These contracts are exempt from the Westchester County Procurement Policy under Section 3 (a) viii under contracts for medical and/or health-related services.
