RE: AUTHORIZATION TO AMEND AN AGREEMENT (IT-1305) WITH SYSCON JUSTICE SYSTEMS LTD. FOR THE UPGRADE OF THE DEPARTMENT OF CORRECTION'S JAIL MANAGEMENT SYSTEM BY EXTENDING THE TERMINATION DATE ONE (1) YEAR FOR A NEW TERMINATION DATE OF OCTOBER 31, 2015 AND BY REFLECTING THE CONTRACTOR'S CORRECT LEGAL NAME, SYSCON JUSTICE SYSTEMS CANADA LTD.

BACKGROUND:

- The Department of Correction (DOC) uses the application software known as the iTAG Offender Management System (the "System") licensed by Syscon Justice Systems Canada, LTD. The System manages all information pertaining to inmates incarcerated in the County's Correctional facilities (Jail/Penitentiary). The System tracks a large variety of information pertinent to management of the inmate population including but not limited to Inmate Booking Intake processes, Inmate Charges and Sentences, Inmate Property Management, Financial Management of inmate trust funds, An interface to the Commissary System, Bail Accounting, Medical Check Lists, Inmate Visitation Management, Inmate photos, Inmate Risk Assessment, Inmate Case Management, Inmate Program/Education Tracking, Inmate Alerts, Tracking of offenses/incidents while in custody, Tracking of offender movements including housing assignments and movements, trips to court, Inmate Head count verification and Critical offender management and State mandated reporting.
- The last iTAG Offender Management System upgrade was completed in early 2004. It is critical for its continued function and support to perform an upgrade of the System. This will insure that the System will continue to operate on the County's supported server and desktop infrastructure in 2013 and beyond and to allow the County to continue to contract for system support and maintenance with Syscon.
- On March 15, 2013 your Honorable Board authorized the County to enter into a new agreement (IT-1305) with Syscon Justice Systems, Ltd. for the upgrade of the Department of Correction's iTAG Offender Management System for a total not to exceed contract amount of \$315,960 and for a term of eighteen months commencing May 1, 2013 and terminating October 31, 2014.

- Authority is hereby now being sought from your Honorable Board to authorize an amendment to Agreement IT-1305 in order to extend the termination date one (1) year to October 31, 2015 and to amend the agreement to reflect the contractor's correct legal name: Syscon Justice Systems Canada Ltd. All other terms and conditions included in agreement IT-1305 would remain the same. The total not-to-exceed contract amount of \$315,960 as well as the public purpose, goals and objectives for this contract (reiterated below) would remain the same.
- Pursuant to Section 9 of the Westchester County Procurement Policy and Procedures, it is our recommendation that after reasonable investigation, it has been determined that support of the software program known as the iTAG Offender Management System from Syscon Justice Systems Canada Ltd., is the only one practicable source for the support of this software. Syscon Justice Systems Canada Ltd. is the sole owner of the proprietary code used in the application; therefore they are the sole source for the support and maintenance thereof.
- This contract will have a public purpose because managing information on inmates including inmate movements, risk factors, visitors and issues, promotes public safety of county residents by allowing for quick access to pertinent information by DOC staff, allowing them to perform their job duties more efficiently.
- The goals and objectives for this contract are to assure stability and business continuity for DOC staff that depend on this application to maintain and track critical information regarding inmates, which is crucial to the efficient delivery of DOC services. Any reported application issues are tracked via a tracking process to assure compliance. Regular status meetings are held between Syscon, and the Departments of Information Technology and Correction to review and promote timely resolution to these issues.
- The contracted system supports both the Fiscal Responsibility and the Safety and Security County Performance Measures. The system supports the Fiscal Responsibility measure by providing average jail census data to Correction; a key factor in staffing, leave and overtime cost management. The system supports the Safety and Security measure by providing feedback to Correction on inmate program effectiveness as it relates to recidivism.
