The objective of this contract is to replace the digester roofs and associated sludge handling equipment at the Peekskill Wastewater Treatment Plant. There is one 80 foot diameter Primary Sludge Digester and one 80 foot diameter Secondary Sludge Digester at the Peekskill Wastewater Treatment Plant. Both digesters were constructed in the late 1970's and were designed with steel floating covers which are constructed of steel truss framing and steel deck plates. The plant's digester roofs and associated sludge handling equipment are reaching the end of their useful life and all are in need of replacement. This work is necessary to insure that the facility operates reliably and efficiently.

This contract is in the public's best interest because it will ensure that the plant's operations are safe and environmentally compliant, thereby enhancing the health and general welfare of the residents of Westchester County.

The department will track scheduling and accomplishments by the contractor and perform on-site inspections to ensure the successful completion of this project.

It is my recommendation that Contract No. 12-539 be awarded to Yonkers Contracting Company, Inc. in the amount of \$11,408,000.00.
